

HYPERION PROCESS CONTROL UNIT

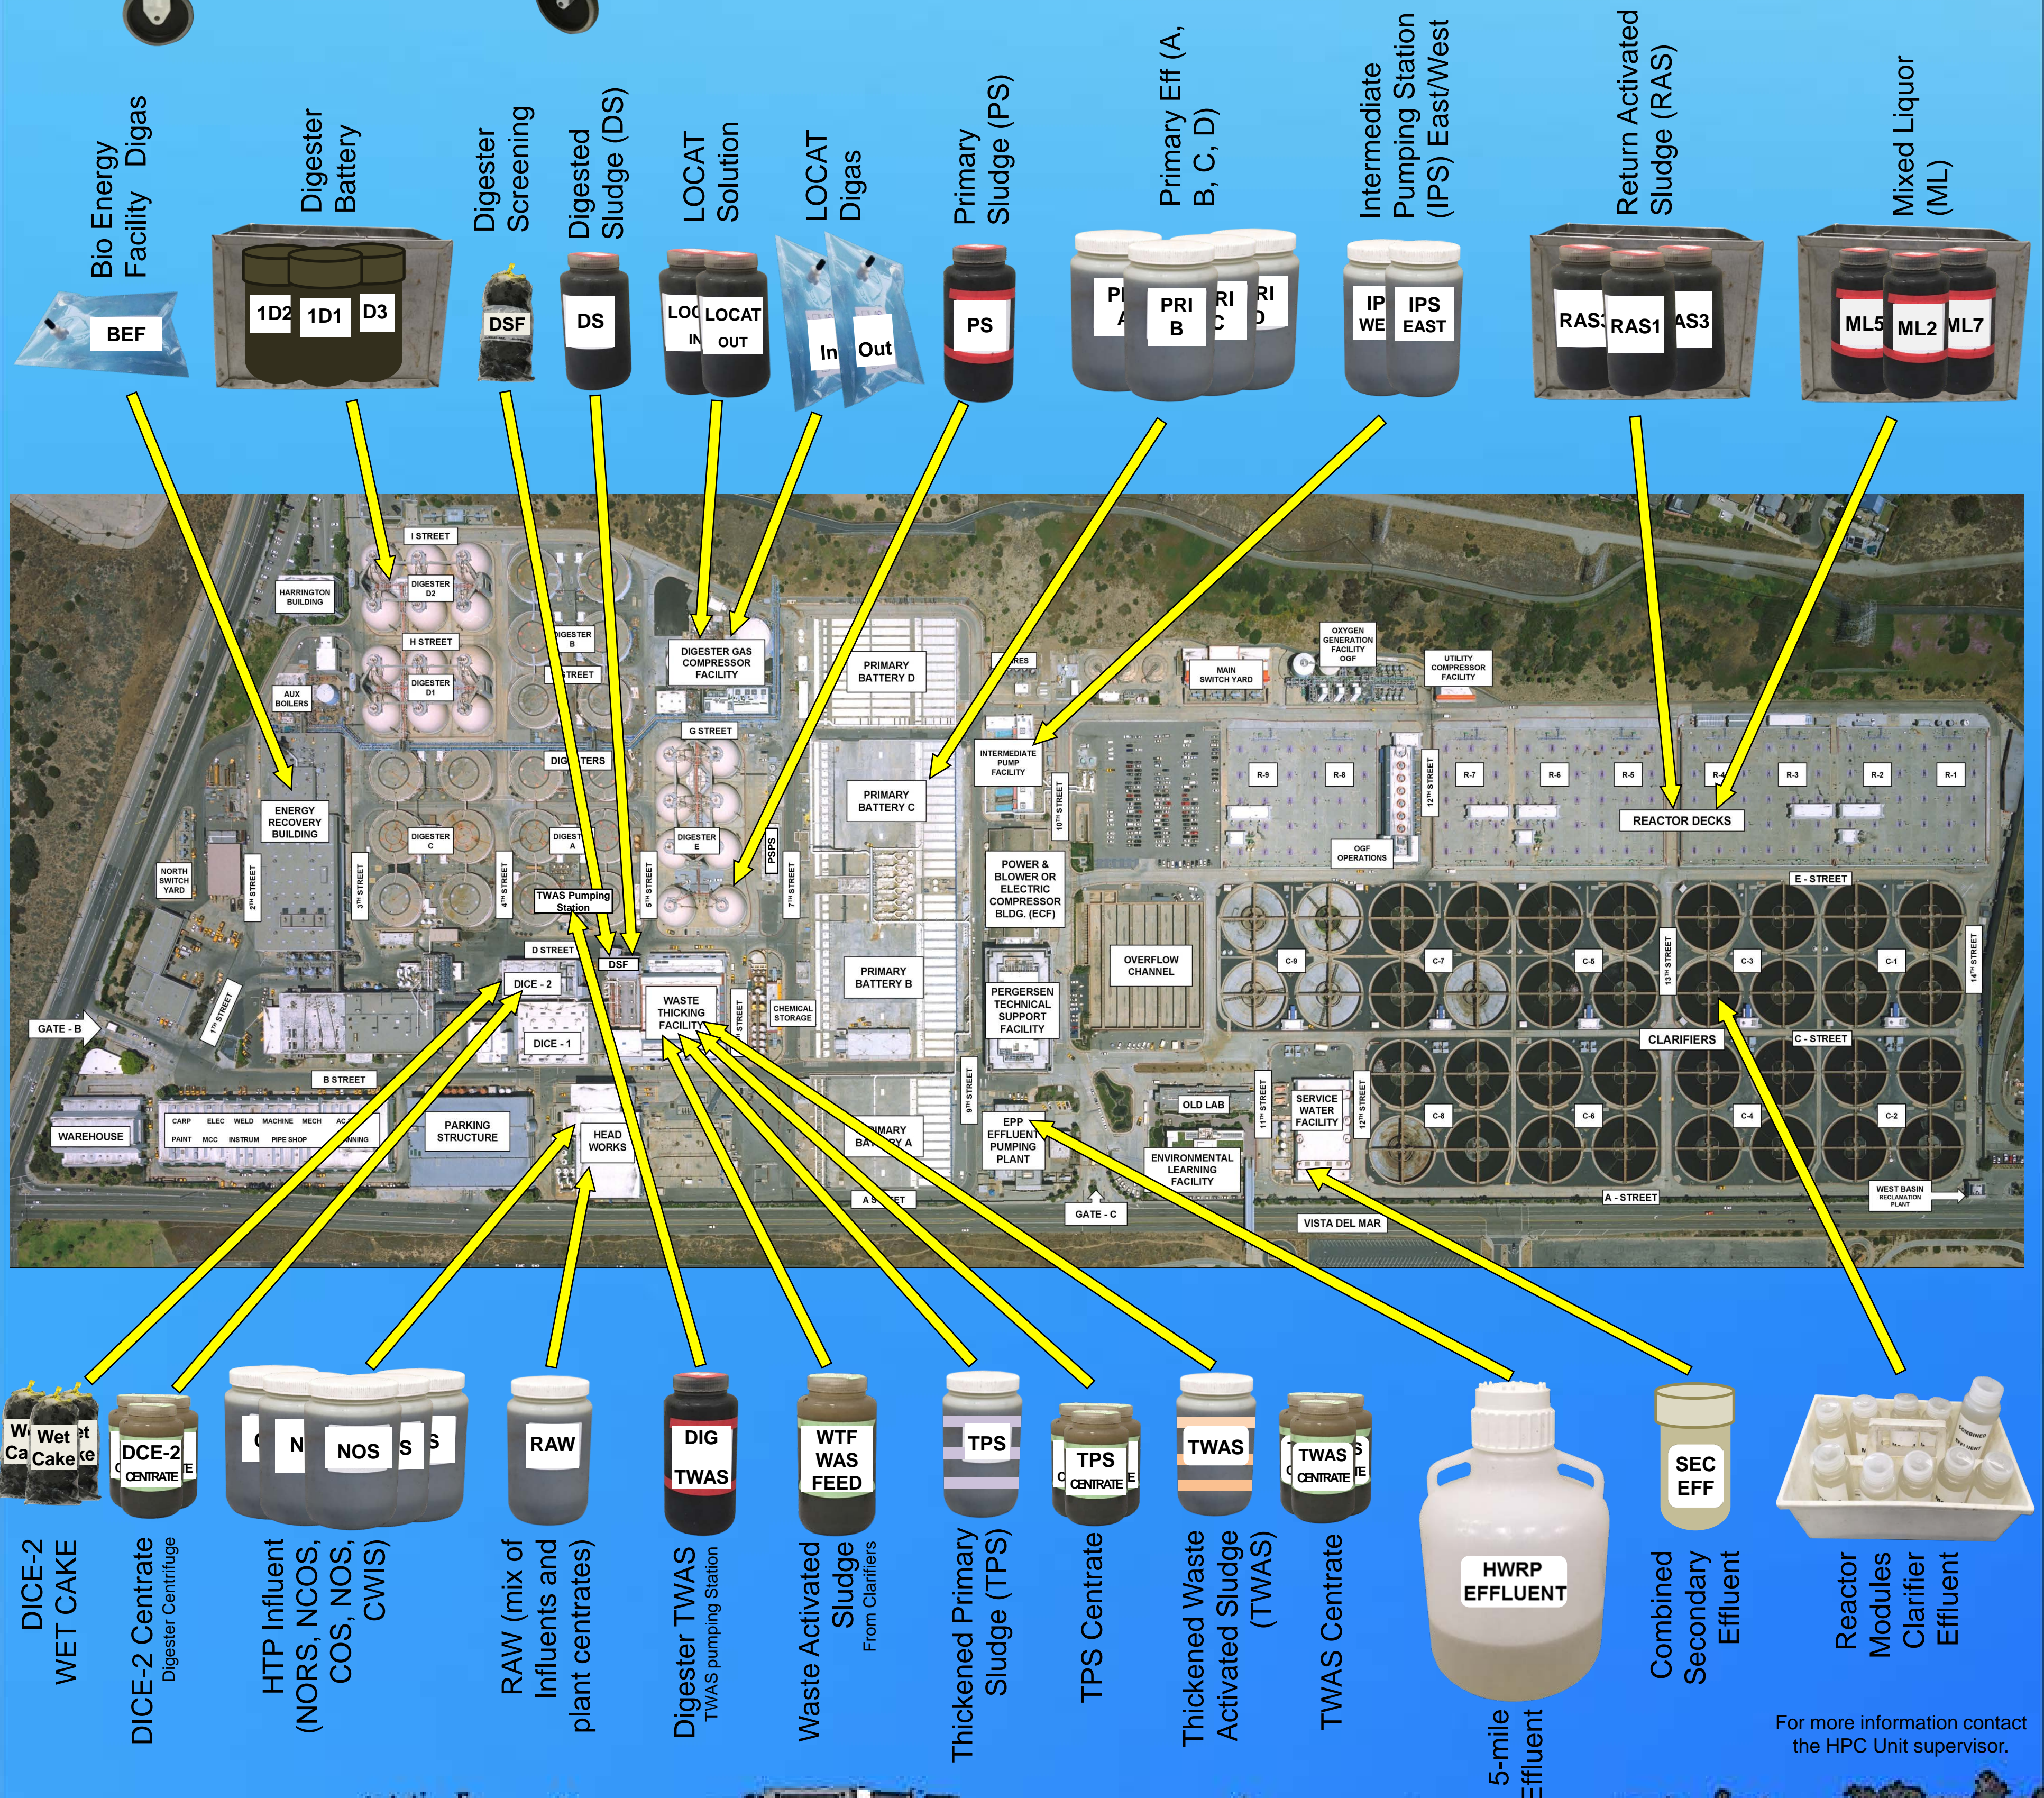

Where are the samples collected?

Daily Cart

Daily Testing

Environmental Monitoring Division staff analyze at least 70 Hyperion Water Reclamation Plant samples per day. These samples include *influent*s, intermediates from the primary and secondary processes such as *sludge*, *thickened sludge*, and *centrates*, and final products such as reclaimed water, *digester gas*, *biosolids*, and *treated effluent*.

For more information contact the HPC Unit supervisor.
